## **INTRODUCTION**

This is the twenty-second annual report of criminal offenses, arrests, law enforcement officers killed or assaulted, and full-time law enforcement employees produced by the Washington Uniform Crime Reporting Program (WUCR). Funding for WUCR is provided by a contract agreed upon with the Washington State Criminal Justice Training Commission (CJTC). Administration of WUCR is the responsibility of the Washington Association of Sheriffs and Police Chiefs (WASPC). WUCR is unique in that it is the only state UCR program which is sponsored, administered and supported by an organization of contributing agency administrators, rather than a bureau or department of state government.

## **WASHINGTON UNIFORM CRIME REPORTING PROGRAM**

Although the impetus for collecting nationwide crime information dates back to the 1890's, no ongoing program was initiated until the committee on uniform crime records of the International Association of Chiefs of Police (IACP) was established in 1917. This committee's responsibility to provide management information to law enforcement agencies was eventually turned over to the Federal Bureau of Investigation (FBI) in 1930, when the FBI received a congressional mandate to collect and disseminate national crime information. The IACP has continued to serve the Uniform Crime Reporting Program (UCR) in an advisory capacity and has been joined in this responsibility by the National Sheriffs Association.

Data for **Crime in Washington State 2000** are compiled from monthly UCR reports submitted by individual law enforcement agencies throughout the State of Washington. WUCR was activated in October 1979 and began the collection of monthly reports from contributing agencies in January 1980. At the present time, the UCR program is operated on a semi-annual and computerized basis. The computer program is designed to provide automated data input processing and provides various programs that are necessary for statistical purposes in the criminal justice system.

## **OBJECTIVES OF WASHINGTON'S UCR**

Increasing attention has been focused on the problem of crime in our communities in recent years. Because of this attention, many segments of our population need more complete information for a variety of reasons.

Citizens are understandably concerned about the possibility of becoming victims of crime but may not know what the real probability is. Law enforcement professionals, managers and administrators who must focus on crime in their own jurisdictions, also need to know what is occurring in surrounding jurisdictions in order to deploy personnel and equipment more efficiently to protect citizens and bring criminals to justice. Legislators need statewide information about crime in order to pass realistic laws that will increase the stability of our society. Researchers and planners need to know what is actually happening to predict trends and recommend changes.

The objectives of **Crime in Washington State 2000** are to implement and administer a uniform system of collecting crime and arrest statistical data from contributing law enforcement agencies in the State of Washington and present the information needed by each of these groups. This information will not in itself prevent crime, but it may encourage segments of society to understand the problem and to work together with law enforcement agencies to reduce crime. Additional objectives of **Crime in Washington State 2000** when compiled and evaluated are:

1. To identify the number of crimes reported by contributing agencies.
2. To identify the geographical distribution of reported offenses.
3. To determine whether or not reported crimes have increased or decreased.
4. To determine whether or not reported crimes have increased or decreased by population groups.
5. To determine the number of clearances and the clearance rate for reported offenses.
6. To determine the reported number of arrests by charge, age, sex and ethnic origin.
7. To determine the number of law enforcement officers assaulted and killed.
8. To determine the number of commissioned (sworn) and civilian law enforcement employees by sex.
9. To determine the rate per population group of commissioned (sworn) and civilian law enforcement employees.

### **CRIME FACTORS**

Care should be taken in drawing conclusions and making decisions about problems based solely on crime and arrest data that is reported to WUCR. Factors relating to crime reporting practices, law enforcement policies, population characteristics and attitudes all contribute to variation in reported data. Some general factors which may affect the amount of crime reported and type of crime committed are:

1. The density and size of the community population and of its surrounding area.
2. The variations in composition of the population, particularly to age.
3. The economic status, education and recreation characteristics of the community population.
4. The stability of population with respect to residents' mobility, commuting patterns, and transient factors.
5. The climate, including seasonal weather conditions, and other geographical variations.
6. The religious characteristics of the population.
7. The effective strength of law enforcement agencies.
8. The policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional and probational).
9. The attitude of the public toward law enforcement problems.
10. The crime reporting practices of the citizenry.
11. The administrative and investigative follow-up of the local law enforcement agency, including the degree of adherence to crime reporting standards.

## **WUCR STATISTICAL INTERPRETATION**

Statistics are a tool used to summarize information so that patterns or trends become clearer. All statistics must be interpreted with an understanding of just what it is that they can say. Too often, numbers of the type in this report are used incorrectly to draw conclusions that the statistics simply do not support. In order to avoid this error, it is necessary to know what information is included and how it is reported.

To obtain accurate information from many different agencies, the national UCR program has to precisely define the methods for counting the number of offenses, arrests, clearances and value of stolen or recovered property. The methods of counting and some resulting limitations are explained below.

### **Classification of Offenses**

UCR divides offenses into two major classifications which are designated Part I and Part II offenses. This distinction is important to keep in mind because different information is collected for each. Part I offenses include (1) violent crimes: murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault; and (2) property crimes: burglary, larceny-theft, motor vehicle theft and (since January, 1979) arson. These reported Part I offenses comprise the FBI crime index. All other offenses are classified under Part II offenses. Part I offenses are used to calculate the crime index and crime rate.

All offenses are classified on the basis of law enforcement investigation in accordance with UCR offense definitions (which are not necessarily identical to the revised code of Washington definitions). Because WUCR identifies and tallies a police problem, offense classifications are not based on the findings of a court, medical examiner, jury or other judicial findings.

### **Counting the Offenses**

The number of offenses is counted only for Part I crimes and simple assault. The method of counting varies with the type of crime committed, and it is important to remember that the number of offenders does not determine the number of offenses.

For murder, non-negligent manslaughter, forcible rape and aggravated assault, one offense is counted for EACH VICTIM, regardless of the number of offenders involved.

For robbery and larceny, one offense is counted for EACH DISTINCT OPERATION that is separate in time and place. The number of victims in any one operation does not determine the number of offenses. For example, if 20 people are robbed in a bar at the same time, only one offense has occurred. However, if that robber leaves the bar and holds up a passerby, a second offense has occurred. For burglary, one offense is counted for each structure that is illegally entered. However, when the structure is an apartment house, business, or office building in which units are leased for a period of time, one offense is counted for each unit burglarized.

For motor vehicle theft, one offense is counted for each vehicle stolen.

**NOTE:** attempts to commit any of the crime index offenses are counted as actual offenses, except that attempts to kill and assault to kill are counted as aggravated assaults.

For multiple offenses that occur in one crime incident, only the most serious offense is counted. Part I crimes are ranked according to seriousness and appear in order from most serious to least serious crimes. Example: a robber takes a man's wallet and then beats him causing serious injury. Both a robbery and an aggravated assault have occurred, but because robbery is considered by UCR to be more serious, only the robbery is counted. This is known as the **HIERARCHY RULE**. From one perspective, this method of counting seriously understates the crime problem, but from another, it prevents undue inflation of crime statistics.

- NOTE:**
1. Arson is an exception to the above rule and is counted separately from other offenses.
  2. The number of offenses is not reported for Part II offenses.

### **Arrests**

Arrest information is collected for all Part I and Part II offenses according to the age, sex and race of the offender. It is not possible, however, to correlate race with sex or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because the arrest totals count all offenders arrested for each offense, and clearance-totals count only the offense for which an arrest or arrests have occurred.

### **Clearances**

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several may have been involved. Offenses may also be cleared by exceptional means when the offender commits suicide, makes a dying declaration, confesses while in custody or serving time for another crime, is prosecuted in another jurisdiction for the same offense, is a juvenile who is handled by notifying the parents, or when the victim refuses to prosecute or another jurisdiction refuses to extradite the offender, etc.

Clearances are counted as "adult" and "juvenile". A "juvenile" clearance is counted only when juveniles are exclusively involved in the clearance of an offense. If the arrest of both adults and juveniles result in a clearance, it is counted as an "adult" clearance.

**NOTE:** not all crimes are cleared within the calendar year in which the offense occurs.

### **Information Grouping**

The crime statistics reported by an individual agency indicate what is happening in one particular area, but to make rational comparisons among a number of jurisdictions, communities with similar characteristics need to be grouped together. It may be important to know how a city compares with cities of similar size, or how patterns of crime differ in various types of communities. Grouping agencies with similar characteristics allows these determinations to be made. Aside from being merely interesting, such comparative analysis provides the basic information for long-range criminal justice planning.

WUCR groups jurisdictions on the basis of population size in this report, and if any types of comparisons are to be made the reader should also consider what type of communities are being compared. Grouping by population size considers only the population of the reporting area. It does not consider proximity to a major metropolitan area in spite of the fact that widely different crime patterns could be expected in a city of 30,000 which is a suburb of Seattle or Tacoma and one which is in a rural area. In this report, grouping by population does not take into account the urban/suburban/rural character of the area, and includes a wide range of populations in each category. For use in interpreting this report, the WUCR grouping systems are listed below:

#### **POPULATION GROUPINGS - CITIES, TOWNS AND SHERIFFS DEPARTMENTS**

<b>GROUP</b>	<b>POPULATION</b>
1	over 250,000
2	100,000 to 250,000
3	50,000 to 100,000
4	25,000 to 50,000
5	10,000 to 25,000
6	5,000 to 10,000
7	2,500 to 5,000
8	under 2,500

## **CRIME INDEX**

The crime index is a basic measure of crime which can be used for comparing the extent of crime among cities, counties and states of similar size. The index is simply the total number of certain offenses that occur in a given area in a given calendar period (usually quarterly and annually). The offenses are murder and non-negligent homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft and arson-- all of the Part I offenses except simple assault and manslaughter by negligence.

The offenses were selected as indicators of the total amount of criminal activity because they are serious offenses that are the focus of widespread concern. They occur with sufficient frequency to reflect fluctuations in the overall level of criminal activity. They are most likely to be reported and reported accurately, to law enforcement due to their seriousness. They are offenses that can clearly and specifically be defined. Notwithstanding its usefulness, the index does have limitations.

The relationship between the index offenses and total criminal activity, both reported and unreported, has never been firmly established. The varying severity of offenses is not taken into account, resulting in equal weight being given to a shoplifting and a forcible rape. Furthermore, the actual incidence of crime in a city may not be accurately depicted by the index if the majority of the city's crime involves non-index offenses such as gambling and narcotics.

## **CRIME RATE**

The crime rate is based on the index, but adjusts the index for variances in population by indicating the number of index offenses for each 1,000 persons (other base population increments may be used such as the number of index offenses per 100,000). This means, that comparisons may be made among several areas with different populations, or within one area with different populations over a period of time, without the information being biased by population differences. For most general comparisons, the crime rate is probably the most accurate to use.

To calculate the crime rate, first divide the population of the area by 1,000, and divide the crime index by that answer. For example, if a city has a population of 273,000 and a crime index of 21,257 the calculations would be:

1. 273,000 divided by 1,000 = 273.0
2. 21,257 divided by 273.0 = 77.86

Thus, although the city's crime index is 21,257, its crime rate (the number of crimes for each 1,000 people) is 77.86.

## LAW ENFORCEMENT CODE OF ETHICS

AS A LAW ENFORCEMENT OFFICER, my fundamental duty is to serve the community; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation and the peaceful against violence or disorder; and to respect the constitutional rights of all to liberty, equality and justice.

I WILL keep my private life unsullied as an example to all and will behave in a manner that does not bring discredit to me or to my agency. I will maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed both in my personal and official life, I will be exemplary in obeying the law and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.

I WILL never act officiously or permit personal feelings, prejudices, political beliefs, aspirations, animosities, or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.

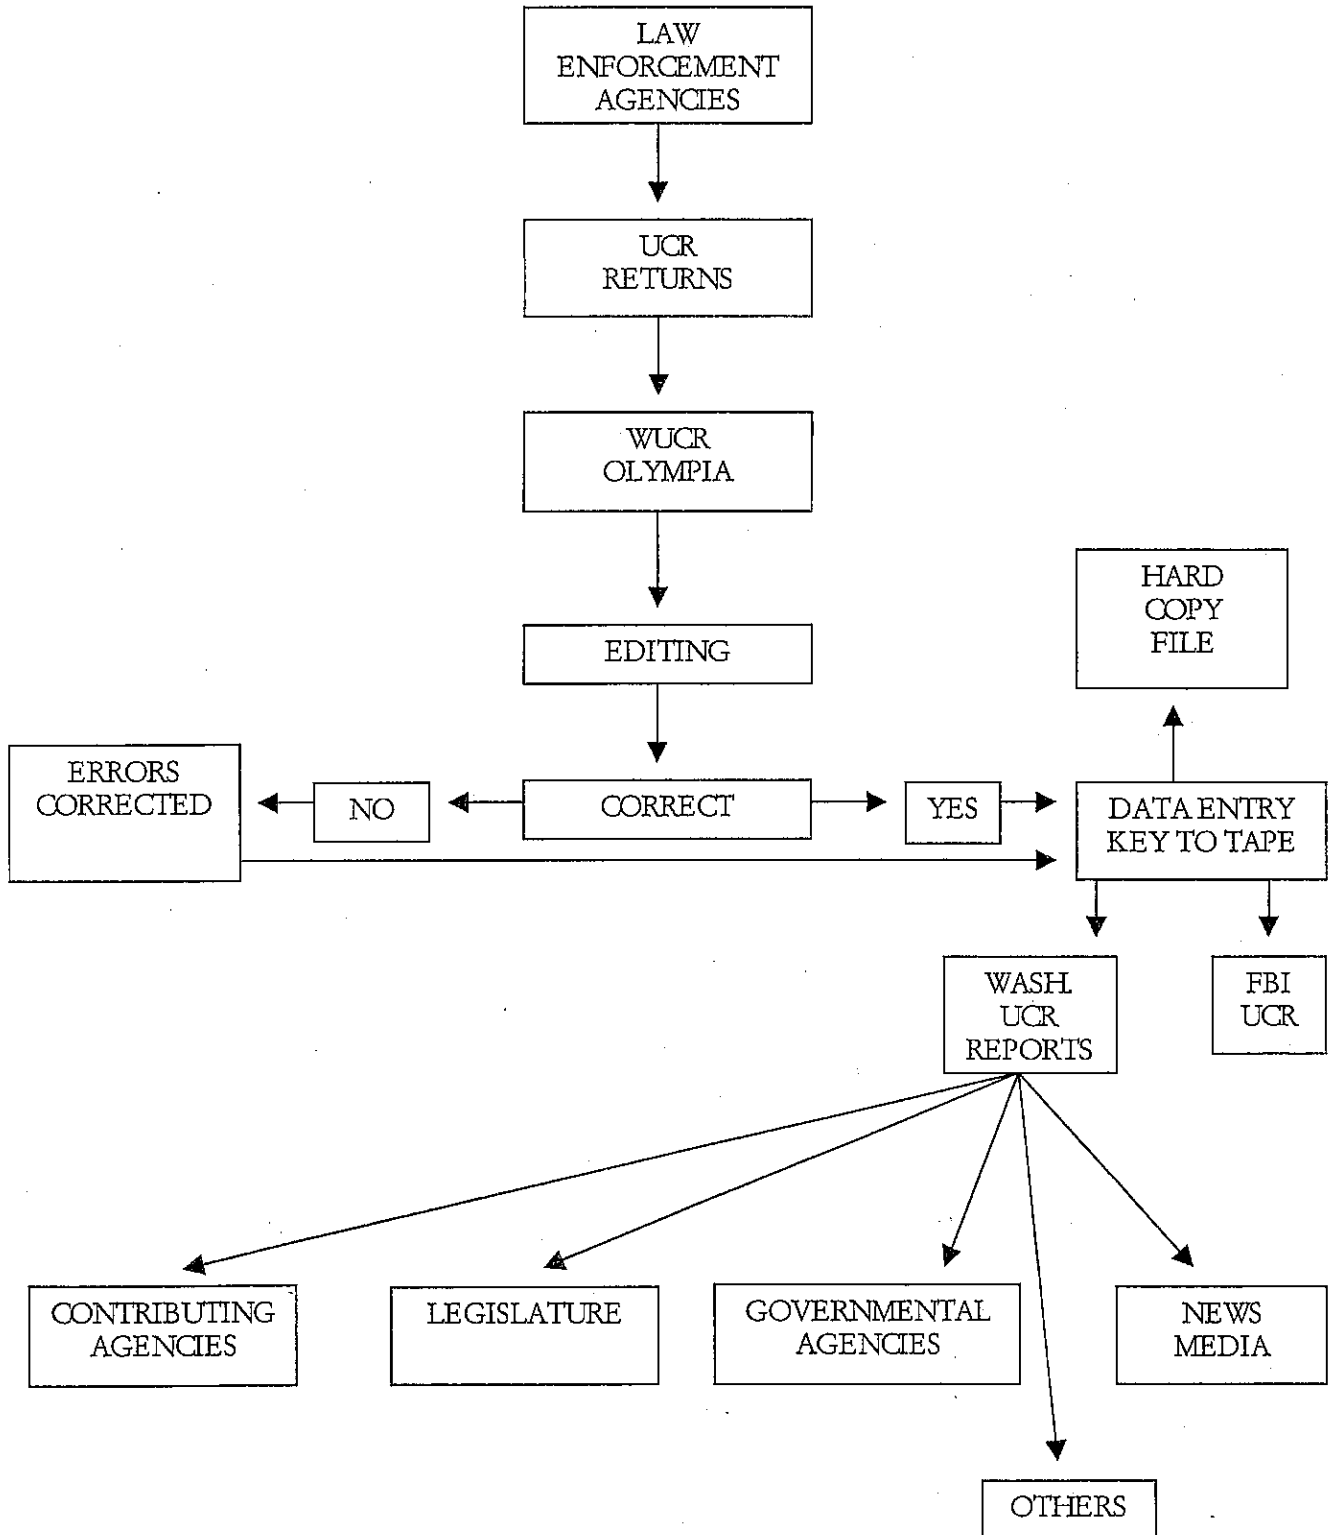

I RECOGNIZE the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of police service. I will never engage in acts of corruption or bribery, nor will I condone such acts by other police officers. I will cooperate with all legally authorized agencies and their representatives in the pursuit of justice.

I KNOW that I alone am responsible for my own standard of professional performance and will take every reasonable opportunity to enhance and improve my level of knowledge and competence.

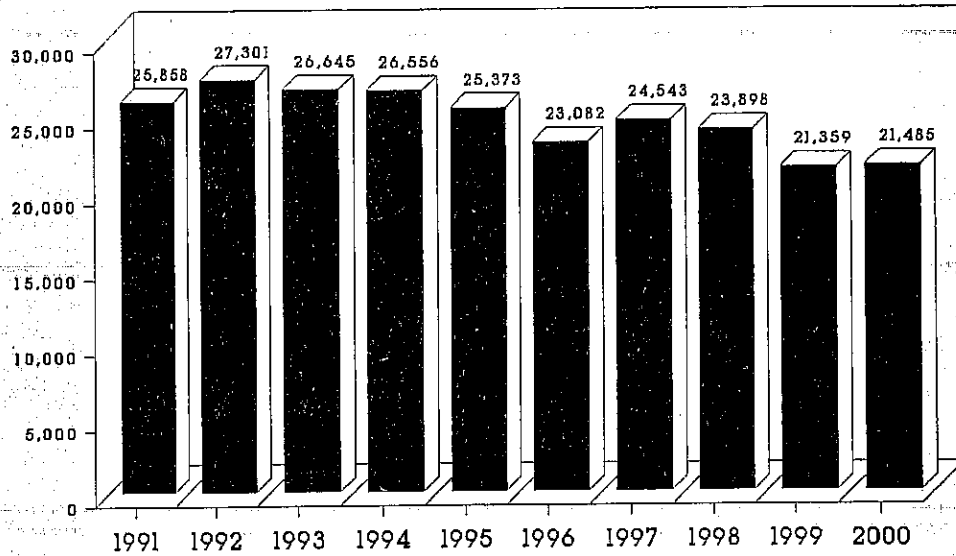

I WILL constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession...law enforcement.

## Law Enforcement Officers Assaulted

**Officers Killed or Assaulted  
and Law Enforcement Employees**

WASHINGTON ASSOCIATION OF  
SHERIFFS AND POLICE CHIEFS

"IN MEMORIAM"

*DEPUTY SHERIFF WALLACE E DAVIS  
CLALLAM COUNTY SHERIFFS OFFICE*

On August 5, 2000, Deputy Wallace E. "Wally" Davis was shot and killed in the line of duty while responding to a 911 disturbance at a residence near Port Angeles. He was found on the front porch by responding back-up officers. The suspect had barricaded himself inside the residence in an altercation with law enforcement officials from eleven different agencies. After a 24-hour standoff, the suspect surrendered himself to officials.

Deputy Davis was a 20-year veteran of law enforcement and had been with the Clallam County Sheriffs Office for five years.

Deputy Davis was 48-years-old and is survived by his wife, Lisa, daughter Jessica, and his sons, Jeff, Joshua, and Jacob. Lisa gave birth to Deputy Davis's son, Jacob Wallace Davis on March 1, 2001.

## Law Enforcement Officers Killed Or Assaulted

Law enforcement officers may become victims of assault as a consequence of their occupations. The Uniform Crime Report addresses all assaults on officers, which involve more than mere verbal abuse or minor resistance to an arrest.

In 2000, one law enforcement officer was feloniously killed in the line of duty in the State of Washington.

In 2000, contributing agencies reported 1,220 officer assaults with 20.8% of the total assaults resulting in personal injury to the officer. The type of activity in which an officer was most likely to be assaulted was responding to disturbance calls, which accounted for 32.3% of the total officers assaulted. Other activities of significance were: Attempting other arrests, 19.3% of the total; traffic pursuits and stops, 12.7% of the total; and investigating suspicious persons or circumstances, 11.9% of the total.

Hands, fists, and feet were used in 82.8% of the total assaults, followed by other dangerous weapon, 12.5%; firearm, 3.3%; and knife or cutting instrument, 1.4%. The type of assignment in which most assaults occurred was a one officer vehicle assisted, resulting in 545 assaults or 44.7%, followed by one officer vehicle alone, with 332 assaults or 27.2%. During a 24-hour period using 8-hour shifts, 6 p.m. to 2 a.m. reflected the most assaults, 661 assaults, or 54.2% of the total. The fewest assaults occurred between 4 a.m. and 12 p.m., 202 or 16.6%.

These facts show that officers stand the highest risk of assault when responding to disturbance calls between the hours of 6 p.m. and 2 a.m., in a one-officer vehicle. The offender is most likely to use their hands, fists, and feet as a weapon.

During 2000, police assaults were cleared (by arrest or exceptional means) 94.2% of the time.

## Hate Bias Crimes

# HATE BIAS

## INTRODUCTION

---

In response to the passage of the Hate Crime Statistics Act of 1990, the Washington State Legislature directed every law enforcement agency within Washington to report hate bias offenses to the Washington Association of Sheriffs and Police Chiefs.

FBI reporting guidelines and forms are used, and the data is forwarded to the FBI for inclusion in the national statistics. In keeping with the Washington State Anti-Harassment Act, two additional motivational categories were added for our state: anti-handicapped (physical, mental, sensory), and anti-gender (male and female). Hate crime offenses with an anti-handicap or anti-gender motivation are not forwarded to the FBI.

Determining the prevalence of hate crime is an important responsibility for the entire law enforcement community. Tremendous interest has been shown by the general public, law enforcement agencies, legislative bodies, human interest groups, and others relative to the collection of hate crime data.

The commitment of Washington State law enforcement is the key to the success of Washington State's hate crime data collection program. Without law enforcement's active participation in the collection of these statistics, this report would not be possible.

### **Hate Crime Definition**

The Washington Hate Crime Malicious Harassment Act defines hate crime as criminal offenses that manifest evidence motivated by the offender's bias against the victim's race, religion, ethnicity, sexual orientation, handicap or gender.

It was recognized that hate crimes are not separate, distinct offenses, but rather traditional crimes motivated by the offender's bias. Because of the difficulty of ascertaining the offender's subjective motivation, bias would be reported when the law enforcement investigation revealed sufficient objective facts to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias.

## 2000 HATE BIAS CRIME

During 2000, 243 bias motivated criminal incidents were reported by 252 law enforcement agencies in 39 counties. The 243 incidents involved 256 separate offenses, 369 victims, and 219 known offenders. It is important to remember that there can be more than one offense within a single incident.
