

Summary Reporting Agencies

The following section provides individual law enforcement agencies' offense counts for only Part I and Part II offenses submitted via the Summary Reporting System method. Part I offenses include 1) violent crimes: Murder and Non-Negligent Manslaughter, Rape*, Robbery, and Aggravated Assault; and 2) property crimes: Burglary, Larceny-Theft, Motor Vehicle Theft, and Arson. All other reportable offenses are classified as Part II offenses.

Please Note: Due to the conversion of our State's agencies from the Summary Reporting System (SRS) to the National Incident-Based Reporting System (NIBRS), the agencies submitting via SRS are using the "historical" definition of Rape and have not implemented any FBI SRS offense updates or additions since the 2007 NIBRS conversion began.*

The populations are based on the Washington State Office of Financial Management "Official November 30, 2014 Population Estimates". The population data reflect permanent residents only. It does not include transient and visitor populations or residents of the military bases and state or federal hospitals.

**FBI Definition of Historical Rape: "The carnal knowledge of a female forcibly and against her will." In 2011, the FBI added a "new" Rape definition; however, due to NIBRS conversion plans, Washington State SRS agencies did not adopt the new definition.*

Comparison of Two-Years of Summary Data Submission

1. Contributing agency's name.
2. The county in which contributing agency is located.
3. The estimated population based on the state Office of Financial Management (OFM) annual November forecast.
4. How many months the Summary data was reported in current year.
5. The list of reportable Part I Summary offenses plus Simple Assault and Violation of Protection/No Contact Order-Domestic Violence offenses. *Note: Washington State agencies submitting Summary Reporting data continue to use the legacy Rape definition rather than the definition released by the FBI in 2011.*
6. The total number of each offense reported in the previous year.
7. The total number of each offense reported in the current year.
8. Percentage of change between current and previous years' offenses.
Note: The percentage of change is calculated following these steps: 1) Subtract this year's total from last year's total, 2) divide the difference by last year's total, and 3) multiply the quotient by 100 for the percentage of change. If last year's total value is zero, then the calculation cannot be done because a number can never be divided by zero. For example: 1) this year's 100 subtracted from last year's 141 = a difference of 41; 2) the difference of 41 divided by last year's total of 141 = a quotient of .29; and 3) the quotient of .29 multiplied by 100 = 29. The percentage of change is 29%.
9. Crime Rate per 1,000 population for each offense category.
10. Total offenses cleared for each offense category.
Note: A clearance can be by "arrest" or "exceptional means" and could possibly be for an offense in a prior year. The number does not reflect the number of persons arrested in an offense. A clearance does not include a case for which a law enforcement agency could not proceed with an investigation due to an uncooperative or unavailable witness or victim.
11. Total offenses classified with Domestic Violence involvement per year.
